

Tips for Parents to use with the Kid Connection Video

Solving a Problem: Responsible Decision Making

Help your child to identify problem situations.

“When _____ happens, that is a problem.”

Model Problem Solving language: e.g., “Let’s work together to figure out how to deal with this problem.” “We can come up with a solution to this problem.” “We can solve this problem.”

Brainstorm problem solutions with your child. Have your child choose a solution and follow up with it.

Debrief with your child. Is the problem solved? Would you handle it differently next time?
