SCHOOL DISTRICT

Protocols for STUDENTS

(Following ACPHD & CDPH Guidance)

Updated April 21, 2022

My student tested positive for COVID...

- Contact the school to report the positive results.
- Your student, regardless of vaccination status, previous infection, or lack of symptoms must isolate themselves at home.
 - Stay home for 5 days (day 0 is the first day of symptoms or the day of the positive test result if they are asymptomatic).
 - Isolation can end AFTER day 5 if symptoms are resolving, the student is fever free, AND a negative antigen test is produced (an at-home antigen test or monitored antigen test with a healthcare provider is preferred). A picture of the negative test result with the student's name and date on the test must be emailed or brought in person to the school site or administrator.
 - If unable to test, choosing not to test, or their symptoms are not resolving, they must continue isolation through Day 10 and return to school on Day 11 (proof of a negative test is not required).
 - It is strongly recommended that they wear a well fitted mask around others, indoors and outdoors for a total of 10 days.

My student has a COVID symptom(s)...

- Your student, regardless of vaccination status experiencing COVID symptoms must isolate themselves at home. Please call the school to report your student's absence.
 - They may return to school when
 - Symptom(s) have improved and they are fever free for 24 hours.
 - It is strongly recommended to take a COVID test to rule out COVID-19, however a negative test is not required to return to school.
 - If unable to test or their symptoms are not resolving, they should continue isolation through Day 10 and return to school on Day 11 (proof of a negative test is not required). (Day 0 is the first day of symptoms.)
 - It is strongly recommended that they wear a well fitted mask around others, indoors and outdoors for a total of 10 days.
 - COVID Symptoms Include:
 - Cough
 - Fever or chills
 - Shortness of breath or difficulty breathing
 - Fatigue
 - Muscle or body aches
 - Headache

- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

My student was exposed to someone with COVID...

- An individual is considered to have had a COVID-19 exposure if they have spent more than a cumulative total of 15 minutes (within a 24-hour time period) in a shared indoor airspace (e.g., classroom) with someone with COVID-19 during their period of infectiousness.
- All exposed students, regardless of vaccination status, can continue to attend school and extracurricular activities as long as they are asymptomatic and not exhibiting COVID-19 symptoms. Modified quarantine protocols for unvaccinated students have been discontinued.
- Upon receiving an exposure notification, CDPH highly recommends that all students, vaccinated or unvaccinated, be tested for COVID-19 within 3-5 days, unless they tested positive for COVID-19 within the past 90 days. Testing is not *required* for school attendance.
- If testing after exposure, you do not need to submit your student's negative test results to your school, however, if your student tests positive for COVID-19, please ensure they isolate at home immediately and notify your school right away.
