CALIFORNIA HEALTHY KIDS SURVEY

Livermore Valley Joint Unified
Secondary
2017-2018
Main Report

Contents

List of Tables

PREFACE

This report provides the detailed results for each question from this school/district's 2017-18 *California Healthy Kids Survey* (CHKS), presented in tables organized by topic.

The CHKS, along with its two companion surveys–*California School Staff Survey* (CSSS) for staff and the *California School Parent Survey* (CSPS)–is a service of the California Department of Education (CDE). These three surveys form the *California School Climate, Health, and Learning Surveys (CalSCHLS) System*, the largest, most comprehensive state effort in the nation to regularly assess students, staff, and parents at the local level to provide key data on school climate and safety, learning supports and barriers, and stakeholder engagement, as well as youth development, health, and well-being. Exhibit 1, at the end of the Preface, presents the major school-related domains and constructs assessed by CalSCHLS.

These surveys grew out of CDE's commitment to helping schools promote the successful cognitive, social, emotional, and physical development of all students; create more positive, engaging school environments for students, staff, and parents; and ensure college and career readiness. They provide a wealth of information to guide school improvement and **Local Control and Accountability Plan** (LCAP) efforts, particularly in regard to the state priorities of enhancing school climate, pupil engagement, parent involvement, and addressing the needs of vulnerable groups.

Factsheets, guidebooks, and other resources to help in understanding and using CHKS results are available for downloading from the survey website (chks.wested.org), including *Helpful Resources for Local Control and Accountability Plans* (chks.wested.org/resources/LCAP‾Cal‾SCHLS.pdf). The California Safe and Supportive Schools website (CaliforniaS3.wested.org) provides information and tools helpful in implementing effective strategies to address the needs identified by the survey.

The CalSCHLS Technical Assistance Center offers a Data Workshop to help identify local needs and develop action plans to meet those needs, including a *Listening to Students Workshop* for involving student voice in the process (see below).

THE SURVEY

The California Department of Education (CDE) has funded the CHKS since 1997 to provide data to assist schools in: (1) fostering safe and supportive school climates, social-emotional competencies, and engagement in learning; (2) preventing youth health-risk behaviors and other barriers to academic achievement; and (3) promoting positive youth development, resilience, and well-being. A thorough understanding of the scope and nature of these student behaviors, attitudes, experiences, and supports is essential for guiding school improvement and academic, prevention, and health programs.

The CHKS is not just a standalone instrument but a data collection system that districts can customize to meet local needs and interests. The secondary-school CHKS consists of a required general Core Module

and a series of optional, supplementary topic-focused modules that districts can elect to administer. Districts may also add their own questions of local interest in a custom module. Table 1 indicates the modules administered by the district/school.

Core Module

As outlined in Exhibit 1, the Core Module consists of key questions, identified by an expert advisory committee, that are considered most important for schools to guide improvement of academic, health, and prevention programs and promote student achievement, college and career readiness, positive development, and well-being. The great majority of the questions are school-specific, including the following indicators:

- Student grades, truancy, attendance rate and reasons for missing school, academic motivation, and school connectedness, as indicators of engagement;

- The levels of students' three fundamental developmental supports (protective factors) that promote positive academic, social, and emotional outcomes: experiences of caring adult relationships, high expectations, and opportunities for meaningful participation at school;

- Perceived safety and the frequency and type of harassment and bullying at school; and

- Levels of violence, substance use, and crime-related behavior (e.g., weapons possession) at school.

The Core Module also includes a wide range of demographic questions to help districts identify and address the needs of significant and vulnerable student subgroups, including those required to be included in the LCAP efforts. These include race/ethnicity, gender, and socioeconomic status; homeless, migrant, and foster status; and English language proficiency.

What's New? For 2017-18, the following improvements are made to the Core Module:

- Added questions assessing frequency of school absences; lifetime frequency of heroin use, and vaping, eating, or drinking marijuana; perceived harm and availability of e-cigarettes; being an immigrant as a reason for being harassed or bullied;

- Modified sexual orientation question to better assess gender identity; and

- Expanded Opportunities for Meaningful Participation scale questions for better reliability.

Supplemental School Climate Module

To further support school improvement efforts and the LCAP process, a supplementary School Climate Module is available. It provides additional data on student academic mindset, school academic supports, discipline/order, supports for social-emotional learning, bullying prevention and positive peer relationships, respect for diversity, and the quality of the physical environment (download from chks.wested.org/administer/download/supplemental/#clim). These questions are also included in the staff survey, so you can compare staff and student perceptions on the same constructs.

Supplemental Social Emotional Health Module (SEHM)

The SEHM greatly enhances the value of the CHKS as a strength-based assessment of positive emotions, engagement, ability to build and maintain relationships, and other social-emotional competencies linked to student mental health and well-being, academic success, and college and career readiness. It includes 56 items that capture the totality of core adolescent psychological assets.

SURVEY ADMINISTRATION AND SAMPLING

School staff administered the survey, following detailed instructions provided by CDE that were designed to assure the protection of all student and parental rights to privacy and to maintain confidentiality. Students were surveyed only with the consent of parents or guardians. Student participation was voluntary, anonymous, and confidential.

- Table A1.1 gives the target sample of students and the final number and percent of students who completed the survey (the participation response rate).

- Appendix I lists all the secondary schools in the district that were eligible to participate in the survey and the percentage of students enrolled in each of them that completed the survey (included in the district report).

- Appendix II provides detailed information about the survey content areas (included in the district report).

THE REPORT

The survey results are reported in tables, organized by topic, that provide the percentages responding to each question response option by grade level. Because it is just as important to identify the positive behaviors of youth as it is to identify the risks they face, the tables reporting risk-behavior data include the percentages of youth who responded negatively (did not engage in the behavior).

Racial/Ethnic and Gender Results

Summary tables provide key findings (e.g., safety, harassment, developmental supports, school connectedness) disaggregated by race/ethnic categories and gender (see Sections 9 and 10). Schools can request supplementary reports disaggregating all their CHKS results by the race/ethnicity or gender of students or by other demographic categories (see Next Steps below).

UNDERSTANDING THE DATA

Care must be taken to understand the factors that can impact the quality, validity, and generalizability of the results, such as changes that occur in survey content, administration, and/or sample characteristics between administrations. The following are a few of the key issues that should be kept in mind. A more detailed discussion of these topics can be found in the *CHKS Guidebook to Data Use and Dissemination* (download chks.wested.org/resources/chks_guidebook_3_datause.pdf).

Sample Characteristics.

Among the most important factors affecting the quality of survey results is the level and type of student participation. The validity and representativeness of the results will be adversely affected if the student response rate is lower than 70%. One indication of the survey's representativeness is how accurately the sample reflects the gender and ethnic composition of the student enrollment. Even if the response rate is low, the results provide an indication of what those students who did respond felt about the school and their experiences and behavior.

Changes Between Survey Administrations.

Many factors besides real changes in behavior, attitudes, or experiences among students may account for changes in results from administration to administration. Changes may be due to differences over time in

the characteristics or size of the sample of students who completed the survey, changes in the questions themselves, or differences between time periods in which the survey was administered (e.g., some risk behaviors tend to increase as students age, or may increase during holidays or social events).

RESOURCES

The CHKS website contains numerous guidebooks and other resources for using and understanding survey results.

- *CHKS **Guidebook to Data Use and Dissemination*** provides step-by-step instructions on how to interpret survey results and effectively disseminate them (download chks.wested.org/resources/chks_guidebook_3_datause.pdf).

- CHKS **factsheets** (chks.wested.org/using-results/factsheets) analyze key topics at the state level, show how data variables are related, and offer suggestions for how data can be analyzed at the local level.

- *Making Sense of School Climate* provides a discussion of all the CalSCHLS survey items that relate to school climate (download californiaS3.wested.org/resources/S3_schoolclimateguidebook_final.pdf).

- *Helpful Resources for Local Control and Accountability Plans* (chks.wested.org/resources/LCAP_Cal_SCHLS.pdf) describes how survey items align with LCAP priorities and indicators. Also available is an LCAP-related PowerPoint presentation (chks.wested.org/training-support/workshops-presentations).

- The *School Climate Connection Newsletter* provides monthly announcements of resources, tools, webinars and workshops, and research. Sign up on the CHKS or CaliforniaS3 websites.

- CDE's **California Safe and Supportive Schools** website (CaliforniaS3.wested.org) contains a wealth of information and tools related to school climate improvement and social-emotional learning. It includes factsheets analyzing CalSCHLS data and *What Works Briefs* that provide guidance on strategies to implement.

NEXT STEPS

Receiving this report is just a beginning step in a data-driven decision-making process of continuous improvement. The following describes some followup steps you should take and some custom services (additional fees apply) available from the CalSCHLS TA Center to help in fostering effective use of the results and provide additional information to support school and program improvement efforts and the LCAP process.

Engage Students, Staff, and Parents in Reviewing the Results and Action Planning

First and foremost, engage students, staff, parents, and community stakeholders in reviewing and exploring the meaning of the results and obtain their input into how the school might better meet the identified needs and into the development of a detailed action plan. This communicates to stakeholders that you value their input into how to improve the schools and gives them an opportunity for meaningful participation. This helps enhance pupil engagement and parent involvement, two LCAP priorities. Their input, in turn, will help in identifying school needs and developing an effective response. It will also promote higher

rates of participation the next time the survey is administered, as stakeholders will see how the data has been used for positive purposes.

As part of this process, it is highly recommended that you conduct a structured *Listening to Students Workshop* in which you explore with students, as adults observe, the meaning of survey results and obtain their input on how to address the needs identified by the survey and school improvement in general. These workshops were found to be a highly effective in fostering school climate improvements as part of CDE's Safe and Supportive School Projects (see CaliforniaS3.wested.org). For more information, email schoolclimate@wested.org.

Compare Results with Other Data

The value of your CHKS results will be greatly enhanced if examined in the content of the following sources of related data.

- **Staff and Parent Surveys**. The results of this student survey should be compared to those obtained from the CalSCHLS surveys of school staff and parents. It is important to determine how consistent are student, staff, and parent perceptions and experiences. If you did not administer these companion surveys, consider doing so next time.

- **Elementary CHKS Results**. Examine how the results from 7th, 9th, and 11th graders compare with those from 5th graders on common indicators to see the developmental trajectory in the results and explore what programs at the elementary level might help mitigate problems that are evident among older students.

- **Other Data**. Examine how the results compare with other data typically collected by schools that relate to the variables assessed, such as discipline referrals, school demographic information, school vandalism costs, and behavioral observations in classrooms.

Data Workshop

To assist in your review of the survey results, you can request the CalSCHLS TA Center to conduct a structured, customized Data Workshop. In this workshop, a survey specialist works with district stakeholders to promote better understanding of the results and to identify local needs that need to be addressed. The workshops can also include engaging stakeholders in developing a detailed Action Plan and timetable for meeting those needs using evidence-based strategies.

For more information, contact your CalSCHLS TA Center (call 888.841.7536) or email schoolclimate@wested.org.

Request Additional Reports and Data

As you review your data with stakeholders, you may find that additional data needs emerge. The following custom services (additional fees apply) are available through the CalSCHLS TA Center to help delve more deeply into your survey results and foster more effective use of the results in support of school and program improvement efforts and the LCAP process.

School Reports and School Climate Report Cards

If the schools in the district vary significantly in demographics, programs, or other characteristics, consider requesting individual reports for each school (a fee applies). Two types of reports are available:

- A full report with all the survey results; and

- A short, user-friendly, graphic **School Climate Report Card** that provides results across eight domains of school climate and provides an overall **School Climate Index** score based on those domains. (View a sample report: visit (californiaS3.wested.org/resources/California_State_SCRC_1314.pdf).

District School Climate Report Card

For districts that survey all their schools, a district-level School Climate Report Card can be requested. This is a powerful, useful tool for guiding efforts to meet the school climate and pupil engagement priorities for the Local Control and Accountability Plan.

Disaggregated Reports

The staff of the Regional TA Centers can produce full reports that look at how results vary by demographic subgroups (e.g., race/ethnicity as discussed above, or by youth who are low in academic motivation compared those who are high). This is particularly important given the LCAP requirement that districts identify and address the needs of underserved, vulnerable subgroups. This helps in understanding the meaning of the results and developing interventions that target groups most in need.

Analyze Dataset

The complete dataset is available electronically for additional analysis (there is a small fee for preparation). The dataset enables analyses of patterns in the results, how they are interrelated, and how they vary by different subgroups of students and across schools within a district. You can also request an analysis from the CalSCHLS TA Center as a custom service.

Add Questions to Your Next Surveys

Determine what additional information is needed from students to guide school improvement efforts and add questions to your next CHKS, staff, or parent surveys. All three surveys are designed so that schools can add additional questions to help them conduct a more individualized and comprehensive assessment.

Exhibit 1
Major School-related Domains and Constructs Assessed by CalSCHLS in Secondary Schools

	Student Core	Student School Climate	Student Social Emotional Health	Staff Survey	Parent Survey
Student Well-Being					
Academic mindset			✓		
Academic motivation	✓	✓		✓	✓

3. Demographics

Table A3.1

Gender of Sample

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Male	53	48	53	55
Female	47	52	47	45

Question HS/MS A.3: What is your sex?
Note: Cells are empty if there are less than 10 respondents.

Table A3.2

Hispanic or Latino

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
No	69	71	73	49
Yes	31	29	27	51

Question HS/MS A.5: Are you of Hispanic or Latino origin?
Note: Cells are empty if there are less than 10 respondents.

Table A3.3

Race

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
American Indian or Alaska Native	2	2	1	0
Asian	9	9	11	0
Black or African American	2	2	3	11
Native Hawaiian or Pacific Islander	2	2	2	0
White	44	50	55	61
Mixed (two or more) races	40	35	28	29

Question HS/MS A.6: What is your race?
Note: Cells are empty if there are less than 10 respondents.

Table A3.4

Living Situation

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
A home with one or more parent or guardian	90	95	96	89
Other relative's home	2	1	1	3
A home with more than one family	3	2	1	0
Friend's home	0	0	0	0
Foster home, group care, or waiting placement	0	0	0	0
Hotel or motel	0	0	0	3
Shelter, car, campground, or other transitional or temporary housing	1	1	0	0
Other living arrangement	3	1	1	6

Question HS/MS A.8: What best describes where you live? A home includes a house, apartment, trailer, or mobile home.
Note: Cells are empty if there are less than 10 respondents.

Table A3.5

Highest Education of Parents

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Did not finish high school	5	9	7	22
Graduated from high school	7	11	12	28
Attended college but did not complete four-year degree	9	12	11	11
Graduated from college	61	59	63	17
Don't know	19	10	6	22

Question HS/MS A.9: What is the highest level of education your parents or guardians completed? (Mark the educational level of the parent or guardian who went the furthest in school.)
Note: Cells are empty if there are less than 10 respondents.

Table A3.6

Free or Reduced Price Meals Eligibility

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
No	61	67	75	31
Yes	20	21	18	61
Don't know	19	12	7	8

Question HS/MS A.10: Do you receive free or reduced-price lunches at school? (Receiving free or reduced-price lunches means that lunch at school is provided to you for free or you pay less for it.)
Note: Cells are empty if there are less than 10 respondents.

Table A3.7

Participation in Migrant Education Program, Past 3 Years

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
No	75	86	93	86
Yes	2	2	1	0
Don't know	23	11	6	14

Question HS/MS A.11: In the past three years, were you part of the Migrant Education Program or did your family move to find seasonal or temporary work in agriculture or fishing?
Note: Cells are empty if there are less than 10 respondents.

Table A3.8

Language Spoken at Home

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
English	78	79	81	66
Spanish	14	14	11	34
Mandarin	1	0	0	0
Cantonese	0	0	0	0
Taiwanese	0	0	0	0
Tagalog	2	1	1	0
Vietnamese	0	0	0	0
Korean	0	0	0	0
Other	5	4	5	0

Question HS/MS A.12: What language is spoken most of the time in your home?
Note: Cells are empty if there are less than 10 respondents.

Table A3.9
English Language Proficiency – All Students

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
How well do you...				
understand English?				
Very well	93	94	95	91
Well	7	5	4	9
Not well	0	0	0	0
Not at all	0	1	0	0
speak English?				
Very well	86	89	93	80
Well	13	9	6	20
Not well	1	1	1	0
Not at all	0	1	0	0
read English?				
Very well	85	87	92	80
Well	13	10	7	20
Not well	1	1	1	0
Not at all	0	1	0	0
write English?				
Very well	82	82	87	83
Well	16	16	11	17
Not well	1	2	1	0
Not at all	0	0	1	0
English Language Proficiency Status				
Proficient	84	86	91	80
Not proficient	16	14	9	20

Question HS/MS A.13-16: How well do you understand, speak, read, and write English?... Understand English... Speak English... Read English... Write English.

Notes: Cells are empty if there are less than 10 respondents.

English Language Proficiency was determined by creating a scale score using four survey questions - how well do you understand... speak... read... and write English. Response options are reverse coded so higher values indicate higher English proficiency level ("Not at all" (1); "Not well" (2); "Well" (3); and "Very well" (4)). The scale score was computed by averaging the survey responses. Respondents are categorized as "Proficient" or "Not Proficient" based on the English language proficiency scale.

Proficient: students with average item response > 3.5; and

Not Proficient: students with average item response ≤ 3.5.

Table A3.10

English Language Proficiency – Students Speaking a Language Other Than English at Home

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
How well do you...				
understand English?				
Very well	82	81	80	83
Well	16	15	17	17
Not well	0	2	1	0
Not at all	1	3	1	0
speak English?				
Very well	72	70	73	50
Well	24	24	20	50
Not well	2	4	6	0
Not at all	1	3	1	0
read English?				
Very well	70	69	75	58
Well	28	25	20	42
Not well	2	3	3	0
Not at all	1	4	2	0
write English?				
Very well	68	62	68	58
Well	27	32	25	42
Not well	3	5	5	0
Not at all	1	1	3	0
English Language Proficiency Status				
Proficient	69	65	71	58
Not proficient	31	35	29	42

Question HS/MS A.13-16: What language is spoken most of the time in your home?... How well do you understand, speak, read, and write English?... Understand English... Speak English... Read English... Write English.

Notes: Cells are empty if there are less than 10 respondents.

English Language Proficiency was determined by creating a scale score using four survey questions - how well do you understand... speak... read... and write English. Response options are reverse coded so higher values indicate higher English proficiency level ("Not at all" (1); "Not well" (2); "Well" (3); and "Very well" (4)). The scale score was computed by averaging the survey responses. Respondents are categorized as "Proficient" or "Not Proficient" based on the English language proficiency scale.

Proficient: students with average item response > 3.5; and

Not Proficient: students with average item response ≤ 3.5.

Table A3.11

Number of Days Attending Afterschool Program

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
0 days	76	80	84	100
1 day	7	3	2	0
2 days	3	3	2	0
3 days	4	1	2	0
4 days	3	1	2	0
5 days	7	11	9	0

Question HS/MS A.17: How many days a week do you usually go to your school's afterschool program?
Note: Cells are empty if there are less than 10 respondents.

Table A3.12

Military Connections

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
No	92	97	97	90
Yes	4	2	2	0
Don't know	4	2	2	10

Question HS A.128/MS A.117: Is your father, mother, or guardian currently in the military (Army, Navy, Marines, Air Force, National Guard, or Reserves)?
Note: Cells are empty if there are less than 10 respondents.

Table A3.13

Sexual Orientation

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Straight (not gay)	82	84	84	74
Gay or Lesbian	1	2	3	3
Bisexual	3	6	6	16
I am not sure yet	7	4	3	3
Something else	1	2	2	3
Decline to respond	6	3	2	0

Question HS A.129/MS A.118: Which of the following best describes you?
Note: Cells are empty if there are less than 10 respondents.

Table A3.14

Gender Identity

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
No, I am not transgender	94	95	96	100
Yes, I am transgender	1	1	0	0
I am not sure if I am transgender	2	2	1	0
Decline to respond	3	2	2	0

Question HS A.130/MS A.119: Some people describe themselves as transgender when their sex at birth does not match the way they think or feel about their gender. Are you transgender?
Note: Cells are empty if there are less than 10 respondents.

4. School Performance, Supports, and Engagement

Table A4.1
Grades, Past 12 Months

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Mostly A's	29	32	23	9
A's and B's	33	33	33	22
Mostly B's	10	9	11	13
B's and C's	16	15	20	16
Mostly C's	4	4	5	13
C's and D's	6	5	6	13
Mostly D's	1	1	1	3
Mostly F's	2	1	1	13

Question HS/MS A.18: During the past 12 months, how would you describe the grades you mostly received in school?
Notes: Cells are empty if there are less than 10 respondents.

Table A4.2
Truancy, Past 12 Months

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
0 times	80	83	75	42
1-2 times	12	8	11	16
A few times	6	4	7	13
Once a month	1	1	1	3
Twice a month	0	0	2	3
Once a week	0	1	1	6
More than once a week	1	2	2	16

Question HS/MS A.21: During the past 12 months, about how many times did you skip school or cut classes?
Notes: Cells are empty if there are less than 10 respondents.

Table A4.3

Absences, Past 30 Days

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
I did not miss any days of school in the past 30 days	50	48	38	18
1 day	21	21	26	21
2 days	13	15	18	24
3 or more days	16	15	17	38

Question HS/MS A.19: In the past 30 days, how often did you miss an entire day of school for any reason?
Notes: Cells are empty if there are less than 10 respondents.

Table A4.4

Reasons for Absence, Past 30 Days

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Does not apply; I didn't miss any school	48	45	36	16
Illness (feeling physically sick), including problems with breathing or your teeth	39	42	48	63
Were being bullied or mistreated at school	1	2	1	3
Felt very sad, hopeless, anxious, stressed, or angry	5	7	12	16
Didn't get enough sleep	7	11	14	34
Didn't feel safe at school or going to and from school	1	1	1	3
Had to take care of or help a family member or friend	2	3	3	19
Wanted to spend time with friends	1	1	1	9
Use alcohol or drugs	0	2	1	9
Were behind in schoolwork or weren't prepared for a test or class assignment	3	5	11	3
Were bored or uninterested in school	2	4	5	6
Had no transportation to school	1	2	2	16
Other reason	16	11	16	13

Question HS/MS A.20: In the past 30 days, did you miss a day of school for any of the following reasons? (Mark All That Apply.)
Notes: Cells are empty if there are less than 10 respondents. Total percentages may exceed 100% for "mark all that apply" items.

Table A4.5

School Environment Scales (Developmental Supports)

A little true	20	22	20	13
Pretty much true	32	38	37	48
Very much true	38	31	34	32

Question HS/MS A.36, 38, 40: At my school, there is a teacher or some other adult... who tells me when I do a good job... who always wants me to do my best... who believes that I will be a success.

Notes: Cells are empty if there are less than 10 respondents.

Table A4.9
Meaningful Participation Scale Questions

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Meaningful participation at school				
Average Reporting "Very much true"	13	10	10	2
At school...				
I do interesting activities.				
Not at all true	14	20	19	19
A little true	32	30	31	48
Pretty much true	32	29	30	29
Very much true	22	21	20	3
I help decide things like class activities or rules.				
Not at all true	43	53	48	45
A little true	30	26	30	32
Pretty much true	16	13	15	23
Very much true	10	7	7	0
I do things that make a difference.				
Not at all true	27	34	31	39
A little true	35	38	39	42
Pretty much true	24	19	20	16
Very much true	14	10	10	3
I have a say in how things work.				
Not at all true	42	47	43	35
A little true	31	32	33	42
Pretty much true	17	14	16	23
Very much true	10	7	8	0
I help decide school activities or rules.				
Not at all true	63	68	65	58
A little true	20	21	20	32
Pretty much true	10	7	10	6
Very much true	7	4	5	3

Question HS/MS A.41-45: At school... I do interesting activities... I help decide things like class activities or rules... I do things that make a difference... I have a say in how things work... I help decide school activities or rules.
Notes: Cells are empty if there are less than 10 respondents.

Table A4.10
School Connectedness Scale Questions

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
School Connectedness				
Average Reporting "Strongly agree"	22	18	16	10
I feel close to people at this school.				
Strongly disagree	5	5	7	3
Disagree	6	8	10	22
Neither disagree nor agree	20	21	24	41
Agree	45	42	40	34
Strongly agree	23	24	19	0
I am happy to be at this school.				
Strongly disagree	7	6	7	9
Disagree	9	8	12	0
Neither disagree nor agree	24	24	29	28
Agree	39	42	37	53
Strongly agree	21	21	16	9
I feel like I am part of this school.				
Strongly disagree	7	5	7	3
Disagree	10	9	12	9
Neither disagree nor agree	24	28	28	41
Agree	38	42	37	41
Strongly agree	22	16	15	6
The teachers at this school treat students fairly.				
Strongly disagree	9	5	6	0
Disagree	12	11	9	3
Neither disagree nor agree	24	26	29	16
Agree	37	44	44	63
Strongly agree	18	14	12	19
I feel safe in my school.				
Strongly disagree	6	5	4	3
Disagree	8	7	7	3
Neither disagree nor agree	22	25	25	25
Agree	40	46	46	53
Strongly agree	25	18	17	16

Question HS/MS A.22-26: How strongly do you agree or disagree with the following statements?... I feel close to people at this school... I am happy to be at this school... I feel like I am part of this school... The teachers at this school treat students fairly... I feel safe in my school.
Note: Cells are empty if there are less than 10 respondents.

Table A4.11
Academic Motivation Scale Questions

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Academic Motivation				
Average Reporting "Strongly agree"	36	34	28	8
I try hard to make sure that I am good at my schoolwork.				
Strongly disagree	3	3	3	0
Disagree	3	4	3	3
Neither disagree nor agree	11	11	14	19
Agree	38	41	44	61
Strongly agree	45	42	35	16
I try hard at school because I am interested in my work.				
Strongly disagree	5	6	6	0
Disagree	12	14	13	17
Neither disagree nor agree	27	22	27	40
Agree	32	33	35	43
Strongly agree	23	25	19	0
I work hard to try to understand new things at school.				
Strongly disagree	4	3	3	0
Disagree	6	5	5	13
Neither disagree nor agree	19	16	20	32
Agree	40	46	46	52
Strongly agree	32	31	26	3
I am always trying to do better in my schoolwork.				
Strongly disagree	3	3	3	0
Disagree	3	4	5	3
Neither disagree nor agree	12	15	18	26
Agree	40	39	41	58
Strongly agree	41	39	32	13

Question HS/MS A.31-34: How strongly do you agree or disagree with the following statements?... I try hard to make sure that I am good at my schoolwork... I try hard at school because I am interested in my work... I work hard to try to understand new things at school... I am always trying to do better in my schoolwork.
Notes: Cells are empty if there are less than 10 respondents.

Table A4.12
Parent Involvement Scale Questions

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Parent Involvement in School				
Average Reporting "Strongly agree"	17	10	9	9
Teachers at this school communicate with parents about what students are expected to learn in class.				
Strongly disagree	8	7	8	3
Disagree	9	18	20	9
Neither disagree nor agree	26	32	35	34
Agree	38	33	29	41
Strongly agree	18	10	8	13
Parents feel welcome to participate at this school.				
Strongly disagree	5	4	5	13
Disagree	7	8	10	6
Neither disagree nor agree	35	42	45	39
Agree	35	34	31	35
Strongly agree	18	12	9	6
School staff takes parent concerns seriously.				
Strongly disagree	6	6	7	3
Disagree	10	14	15	3
Neither disagree nor agree	36	42	36	47
Agree	33	30	33	38
Strongly agree	14	8	9	9

Question HS/MS A.28-30: How strongly do you agree or disagree with the following statements?... Teachers at this school communicate with parents about what students are expected to learn in class... Parents feel welcome to participate at this school... School staff takes parent concerns seriously.
Notes: Cells are empty if there are less than 10 respondents.

Table A4.13

Quality of School Physical Environment

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
My school is usually clean and tidy.				
Strongly disagree	9	8	10	6
Disagree	17	20	22	3
Neither disagree nor agree	28	28	29	25
Agree	34	36	33	50
Strongly agree	11	8	6	16

Question HS/MS A.27: How strongly do you agree or disagree with the following statements?... My school is usually clean and tidy.
Notes: Cells are empty if there are less than 10 respondents.

5. School Violence, Victimization, and Safety

Table A5.1

Perceived Safety at School

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Very safe	18	16	16	33
Safe	45	45	45	40
Neither safe nor unsafe	28	33	31	23
Unsafe	6	4	6	3
Very unsafe	4	3	2	0

Question HS A.99/MS A.88: How safe do you feel when you are at school?
Notes: Cells are empty if there are less than 10 respondents.

Table A5.2

Reasons for Harassment on School Property, Past 12 Months

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Race, ethnicity, or national origin				
0 times	86	87	89	97
1 time	6	5	5	0

2 to 3 times	3	1	1	0
4 or more times	2	1	1	3
been threatened or injured with a weapon (gun, knife, club, etc.)?				
0 times	96	97	97	97
1 time	3	2	1	0
2 to 3 times	1	1	1	3
4 or more times	0	1	1	0
been offered, sold, or given an illegal drug?				
0 times	91	79	79	81
1 time	5	9	8	3
2 to 3 times	2	6	6	10
4 or more times	2	6	7	6

Question HS A.100-102, 107, 111, 113/MS A.90-92, 97, 101, 103: During the past 12 months, how many times on school property have you... been pushed, shoved, slapped, hit, or kicked by someone who wasn't just kidding around... been afraid of being beaten up... been in a physical fight... been offered, sold, or given an illegal drug... been threatened or injured with a weapon (gun, knife, club, etc.) ... been threatened with harm or injury?
Note: Cells are empty if there are less than 10 respondents.

Table A5.5

Property Damage on School Property, Past 12 Months

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Had your property stolen or deliberately damaged				
0 times	83	89	90	90
1 time	10	7	6	10
2 to 3 times	3	2	1	0
4 or more times	4	2	2	0
Damaged school property on purpose				
0 times	94	95	97	94
1 time	4	3	2	6
2 to 3 times	1	1	1	0
4 or more times	1	0	1	0

Question HS A.106, 108/MS A.96, 98: During the past 12 months, how many times on school property have you... had your property stolen or deliberately damaged, such as your car, clothing, or books... damaged school property on purpose?

Note: Cells are empty if there are less than 10 respondents.

Table A5.6

Weapons Possession on School Property, Past 12 Months

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Carried a gun				
0 times	99	99	99	97
1 time	1	1	0	0
2 to 3 times	0	0	0	3
4 or more times	0	0	0	0
Carried any other weapon (such as a knife or club)				
0 times	95	98	97	97
1 time	2	1	1	0
2 to 3 times	1	0	0	3
4 or more times	2	1	1	0
Seen someone carrying a gun, knife, or other weapon				
0 times	85	89	92	81
1 time	8	7	4	10
2 to 3 times	4	3	2	6
4 or more times	2	2	2	3

Question HS A.109, 110, 112/MS A.99, 100, 102: During the past 12 months, how many times on school property have you... carried a gun... carried any other weapon (such as a knife or club)... seen someone carrying a gun, knife, or other weapon?

Note: Cells are empty if there are less than 10 respondents.

6. Alcohol and Other Drug Use

Table A6.1

Summary Measures of Level of AOD Use and Perceptions

	Grade 7 %	Grade 9 %	Grade 11 %	NT %	Table
Lifetime illicit AOD use to get "high"[†]	11	24	42	65	A6.2
Lifetime alcohol or drugs (any use)	11	26	43	71	A6.2
Lifetime very drunk or high (7 or more times)	1	7	12	48	A6.7
Lifetime drinking and driving involvement	23	6	14	26	A6.11
Current alcohol or drugs	5	12	21	45	A6.5
Current heavy drug uses	1	6	8	35	A6.5
Current heavy alcohol use (binge drinking)	1	2	8	40	A6.5
Current alcohol or drug use on school property	2	5	4	16	A6.8
Harmfulness of occasional marijuana use[‡]	41	38	32	19	A6.12
Difficulty of obtaining marijuana[§]	22	7	5	13	A6.13

Notes: Cells are empty if there are less than 10 respondents.

[†]*Excludes prescription pain medication, Diet Pills, and prescription stimulant.*

[‡]*Great harm.*

[§]*Very difficult.*

Table A6.2
Summary of AOD Lifetime Use

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Alcohol	7	18	38	58
Marijuana	4	15	27	58
Inhalants	3	3	2	3
Cocaine, Methamphetamine, or any amphetamines	na	2	2	16
Heroin	na	2	0	3
Ecstasy, LSD, or other psychedelics	na	3	5	10
Prescription pain killers, Diet Pills, or other prescription stimulant	na	8	11	32
Cold/Cough Medicines or other over-the-counter medicines to get "high"	na	5	4	19
Any other drug, pill, or medicine to get "high"	2	3	2	10
Any of the above AOD use	11	26	43	71
Any illicit AOD use to get "high"[†]	11	24	42	65

Notes: Cells are empty if there are less than 10 respondents.

[†]*Excludes prescription pain medication, Diet Pills, and prescription stimulant.*

na—Not asked of middle school students.

Question HS A.56-60/MS A.54: During your life, how many times have you used the following?... Prescription pain medication or opioids (Vicodin™, OxyContin™, Percodan™, Lortab™), tranquilizers, or sedatives (Xanax™, Ativan™)... Diet Pills (Didrex, Dexedrine, Zinadrine, Skittles, M&M's)... Ritalin™ or Adderall™ or other prescription stimulant... Cold/Cough Medicines or other over-the-counter medicines to get "high"... Any other drug, pill, or medicine to get "high" or for other than medical reasons.
Notes: Cells are empty if there are less than 10 respondents.
na—Not asked of middle school students.

Table A6.4

Lifetime Marijuana Consumption

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
During your life, how many times have you used marijuana in any of the following ways...				
Smoke it?				
0 times	98	88	76	45
1 time	1	2	5	3
2 to 3 times	1	3	5	3
4 or more times	1	7	14	48
In an electronic or e-cigarette or other vaping device?				
0 times	97	86	77	42
1 time	1	4	5	0
2 to 3 times	1	2	5	13
4 or more times	1	8	13	45
Eat or drink it in products made with marijuana?				
0 times	98	92	84	48
1 time	1	2	5	6
2 to 3 times	0	2	5	6
4 or more times	1	4	6	39

Question HS A.64-66/MS A.58-60: During your life, how many times have you used marijuana in any of the following ways... Smoke it?... In an electronic or e-cigarette or other vaping device?... Eat or drink it in products made with marijuana?

Note: Cells are empty if there are less than 10 respondents.

Table A6.5
Current AOD Use, Past 30 Days

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Alcohol (one or more drinks of alcohol)	3	7	15	42
Binge drinking (5 or more drinks in a row)	1	2	8	40
Marijuana (smoke, vape, eat, or drink)	2	9	15	39
Inhalants	2	1	1	0
Prescription drugs to get "high" or for reasons other than prescribed	na	1	1	10
Other drug, pill, or medicine to get "high" or for reasons other than medical	1	2	1	3
Any drug use	3	10	15	39
Heavy drug use	1	6	8	35
Any AOD Use	5	12	21	45
Two or more substances at the same time	na	2	4	19

Question HS A.70-76/MS A.64-68: During the past 30 days, on how many days did you use... one or more drinks of alcohol... five or more drinks of alcohol in a row, that is, within a couple of hours... marijuana (smoke, vape, eat, or drink)... inhalants (things you sniff, huff, or breathe to get "high")... prescription drugs to get "high" or for reasons other than prescribed ... any other drug, pill, or medicine to get "high" or for reasons other than medical... two or more substances at the same time (for example, alcohol with marijuana, ecstasy with mushrooms)?
Notes: Cells are empty if there are less than 10 respondents.
Heavy drug use was calculated based on pattern of combined current drug use on three or more days (marijuana, inhalants, prescription pain medicine to get "high" (high school only) and any other illegal drug/pill to get "high").
na—Not asked of middle school students.

Table A6.6

Frequency of Current AOD Use, Past 30 Days

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Alcohol (one or more drinks)				
0 days	97	93	85	58
1 or 2 days	2	5	10	13
3 to 9 days	0	1	4	13

Appendix II

California Healthy Kids Survey Content Overview

This brief guide to key CHKS Core Module indicators is designed to help survey users more easily understand and interpret their findings.[1] References are provided to the tables in CHKS reports where results for the indicators discussed can be found. References are also made to relevant CHKS reports and factsheets and What Works Briefs (guides to best practices) that provide further information. These valuable resources can be downloaded, respectively, from the CHKS and California Safe and Supportive Schools websites (chks.wested.org/using-results/factsheets; californiaS3.wested.org/tools/research; californias3.wested.org/tools/wwb).

Special attention is directed toward indicators related to the requirements of California's Local Control and Accountability Plans (LCAP).[2] For a summary of state-level LCAP-related baseline data, see CHKS Factsheet #15.

MAIN CONTENT FOCUS: SCHOOL CLIMATE AND THE NEEDS OF THE WHOLE CHILD

The main purpose of the CHKS Core Module is to assess indicators of school climate, pupil engagement, and student supports, all three key priorities required of Local Control and Accountability Plans. It seeks to provide schools with essential data to determine the degree to which they provide the conditions and supports that all youth need to succeed in school and developmentally thrive. Twenty-nine items assessing seven domains are used to calculate a School Climate Index (SCI) score that is included in a *School Climate Report Card* that districts can request at the district and school level. The items used in the SCI assess school connectedness, developmental supports (e.g., caring adult relationships), perceived safety, bullying, and victimization.

School climate, as measured by the CHKS, is strongly related to student performance on standardized academic tests. Data show that, for high school students, as CHKS School Climate Index (SCI) scores increased—as the schools became safer, more supportive, and more engaging—test performance as measured by the state's Academic Performance Index (API) increased as well (School Climate Factsheet #3).

In a ground-breaking analysis, a positive school climate was a distinguishing characteristic of California secondary schools that "beat the odds" and consistently performed better on the state's standardized tests than *would be predicted* based on the characteristics of their students (i.e., comparing schools with similar student demographics). The higher (more positive) the CHKS School Climate Index score, the greater the probability there was for beating the odds. School climate was more strongly associated with beating the odds than a school's level of personnel resources (School Climate Factsheet #6).[3]

---

[1] To see how local results compare with state averages in California, download a copy of the latest Biennial Statewide CHKS report (chks.wested.org/reports). The Biennial report provides results from a randomly-selected, representative state sample. County level reports are also available on the CHKS website.

More generally, the CHKS Core Module provides data to help understand the degree to which schools address the needs of the Whole Child. CHKS data show that California secondary schools made greater progress in raising standardized test scores over a one-year period when they had higher percentages of students who: (1) were less engaged in risky behaviors such as substance use and violence; (2) were more likely to eat nutritiously and exercise; and (3) reported experiencing caring adult relationships and high expectations at school. These results suggest that addressing the health and developmental needs of youth is a critical component of a comprehensive strategy for meeting accountability demands for improved academic performance (CHKS Factsheet #3).

GRADE-LEVEL PATTERNS

More than twenty years of survey administration has demonstrated that as youth progress through secondary school, they become: (1) less likely to feel connected to school and be academically motivated; and (2) more likely to report truancy, involvement in substance use, and chronic sadness and hopelessness.

- **Seventh graders** report the highest rates of harassment and victimization, as well as participation in a physical fight and seeing a weapon on campus.

- **Ninth graders** report the lowest rates of developmental support and perceived safety.

- In interpreting the results for **11th graders** take into consideration that many youth who are most disengaged and involved in high risk behaviors may have already dropped out of school or did not participate in the survey because of truancy or absenteeism.

- Across risk behaviors and problem indicators, **nontraditional (continuation school) students** reported prevalence rates at least twice those of 11th graders in a comprehensive school setting. They also exhibited lower perceived school safety, school connectedness, and developmental supports. Continuation school students are a highly vulnerable population in need of a wide range of academic, social, emotional, and behavioral supports and intervention services (CHKS Factsheet #7).

DEMOGRAPHIC CHARACTERISTICS AND POPULATION SUBGROUP DIFFERENCES

Demographic Characteristics (Tables A3.1-3.14)

A wide range of data on the demographic and background characteristics of the survey respondents is provided (in 14 tables) to help users gain a better sense of how representative the survey sample is compared to the student population overall. This also enables users to analyze their data to determine how survey results vary by important subgroups in the school and help them identify, and target programs at, the youth most in need. School districts can use these data to meet the Local Control and Accountability Plan (LCAP) requirement to demonstrate actions across state priorities in regard to six numerically significant subgroups: ethnicity, socioeconomically (SES) disadvantaged, English learners, pupils with disabilities, foster youth, and homeless youth—all categories assessed by the CHKS. In the standard CHKS report, and in the Query CHKS system, breakdowns for selected key indicators are provided by race/ethnicity and gender. Districts/schools

can request reports disaggregating all their results by demographic characteristics from their Regional CHKS Technical Assistance Center.

Racial-Ethnic Identification (Tables A3.2-3.3)

Respondents self-report their identification with six racial/ethnic groups plus mixed (two or more) race. Comparing these data with other evidence of the racial-ethnic composition of student enrollment provides insight into how representative are the survey results. In one study of CHKS data, both academic performance and school well-being—the degree to which students feel safe at, supported by, and connected to the school—varied consistently and persistently across schools by racial/ethnic groupings. They were lowest in schools with large proportions of African American and Hispanic students, as well as in low-income schools. Controlling for socioeconomic status and other school demographic characteristics reduced these racial/ethnic group differences, but they still remained. This suggests that school climate factors related to student well-being may also play a role in the racial-ethnic achievement gap. One strategy to close the gap thus may be to enhance learning supports that foster caring adult relationships, high expectations, meaningful participation, safety, and connectedness in schools serving large proportions of low-income African American and Hispanic students (CHKS Factsheet #8).

In the majority of cases, with notable exceptions for Asians, *the racial/ethnic gaps in performance, engagement, perceived support, and safety are greater within-schools than between-schools.* African American, Latino, and Asian students feel less safe, engaged, and supported than their White peers *within the same school.* Inequities in these factors, for the various racial/ethnic groups, can possibly contribute to the achievement gap. Further, these findings suggest that practices designed to ensure equal access to academic resources, opportunities, learning supports, and promotion of common experiences may be effective in ameliorating the gap (CHKS Factsheet #13).

Foster Care Youth (Table A3.4)

Compared to youth who live with their parents, foster care youth report much higher rates of substance abuse, poor school attendance and grades, more violence-related behaviors, more harassment, and higher depression risk. They were also more likely to be low in caring adult relationships and total environmental assets (CHKS Factsheet #6).

SPECIFIC CONTENT AREAS

Self-Reported Grades (Table A4.1)

The CHKS asks students to indicate what grades they mostly received in school in the past 12 months. Although self-reports are not as accurate as actual report card data, they provide a general sense of the school performance of the survey respondents from their self-perception. To learn more about the factors that might be causing poor performance, request a CHKS report showing how all the survey results vary by level of performance.

Absenteeism and Truancy (Tables A4.2-4.3)

Before top teachers with quality curriculums and engaging activities can even attempt to improve academic performance, the students have to show up. The CHKS report provides data to identify what proportion of respondents are at risk of chronic absenteeism (missed 3 or more of the past 30

school days), what were the reasons for absences, and the level of truancy. Users can request reports looking at the characteristics of youth based on the absenteeism and truancy to guide efforts to improve the LCAP pupil engagement priority.

Poor attendance is a marker of a wider variety of other problems, including low school connectedness and learning engagement. Both the US Department of Education and the California Office of the Attorney General have launched initiatives designed to raise awareness about and combat chronic absenteeism, generally defined as missing 10% of school days. According to a report by Attendance Works, the nation's large and persistent education achievement gaps are rooted in a largely hidden crisis of chronic absenteeism, especially among low-income and minority children.[4] Biennial State CHKS data (Table A4.3) indicate that generally, after illness, the most important reasons for being absent in secondary school are not getting enough sleep and anxiety or stress, followed by being behind in school work, and being bored or uninterested in school.

Among high school staff statewide, truancy is the top-rated of fourteen potential school problems assessed by the California School Staff Survey (Table A8.4). Truancy has been identified as one of the most powerful predictors of both poor achievement and delinquency.[5] Truants are also more likely to use drugs and have deviant friends.

Developmental Supports (Tables A4.5, A4.7-4.9)

Research shows that when schools (or families or communities) provide three developmental supports measured by the CHKS—**caring adult relationships, high expectations, and opportunities for meaningful participation**—students are more likely to report more positive academic, social-emotional, and health outcomes, including higher grades, school connectedness, attendance, and perceived safety. CHKS results overall suggest that the great majority of students do not receive sufficient levels of support and that the supports received are lower in high school than in middle school, even though student need for them is arguably higher (CHKS Factsheets #1 and #3; School Climate Factsheets #1 and #2, What Works Briefs #1 and #2).

School Connectedness (Table A4.6)

School connectedness is one of the indicators of school climate that a California school district must address in its LCAP. Research shows that school connectedness is associated with multiple positive academic, social-emotional, and health outcomes. The CHKS five-item School Connectedness Scale is an important differentiator between low-performing and high-performing high schools and has value as an indicator of school quality. School connectedness appears to have increased in California in the second half of the last decade, but it still declines markedly after elementary school. A substantial majority of high school students are not highly connected to their schools. This may be related at least in part to their lower levels of developmental support. The lowest rates of both connectedness and test scores are in low-income schools. The online Query

CHKS system shows how key survey indicators vary by school connectedness (see School Climate Factsheet #5, What Works Brief #4).

Perceived Safety (Table A5.1)

Perceived safety is another indicator districts/schools are required to monitor as part of their LCAP. Perceived school safety is more than the antithesis of violence. Perceived school safety is psychological as well as physical. Feelings of insecurity can have multiple sources, not all of which correctly reflect the level of danger and violence on a school campus, such as verbal bullying. Both physical and psychological safety are essential for high quality teaching and learning. If students report low levels of perceived school safety, pay close attention to all the indicators related to bullying and victimization, as well as mental health. Schools may want to request comparisons of students' perceptions of their own safety with the actual level of violence and other safety-related indicators self-reported by students. A follow-up focus group or Student Listening Circle asking why students do not feel safe is recommended (see School Climate What Works Brief #3).

Violent and Nonviolent Misbehavior on School Property (Tables A5.2-5.6)

The CHKS asks students a wide range of questions to ascertain the scope and nature of physical and verbal violence and victimization that occurs on campus, as well as vandalism. Physical violence and weapons on campus (Tables A5.4, A5.6) have long been a major public concern. Equally disruptive are the uncounted acts of bullying, teasing, and other nonviolent misbehavior among youth, such as substance use and sales on campus.[6] These behaviors adversely affect not only students' ability to learn and willingness to attend school, but also the overall school environment, the ability of teachers to teach, and the willingness of adults to enter the teaching profession[7] (see School Climate What Works Briefs #5 and #6).

Harassment (Tables A5.2-5.3)

Nonviolent harassment in any form—threats, intimidation, rumors, and ostracism—can instill a sense of vulnerability, isolation, frustration, and fear among its victims, leading to engagement in health risk behaviors or avoidance behaviors such as missing school and social isolation. This type of misbehavior, vastly more common than any other, ruins the school day for many students. In *Bruised Inside* (2000), the National Association of Attorneys General describes harassment by peers as one of the two causes for kids to express anger using guns, knives, and fists.[8]

The CHKS asks about the frequency with which students experienced any bullying/harassment related to six bias-related categories (gender, race/ethnicity, disability, sexual identity, religion, immigrant status), as well as for any other reason. Analysis of this data show that victims of harassment are more likely to not feel safe at, and connected to, school; to have higher truancy; and to experience lower developmental (resilience) supports at school. They report higher rates of fighting and weapons possession at school, as well as risk of depression. Students who report bias-related harassment, particularly for disability and sexual orientation, have poorer well-being than

students who were only harassed for other reasons (CHKS Factsheets #4 and #10; see also School Climate What Works Brief #7).

Substance Abuse (Tables A6.1-6.11)

The misuse of alcohol and other drugs continues to be among the most important issues confronting the nation. For schools, the problem is particularly relevant. Years of research have shown that adolescent substance use is closely connected to academic performance and contributes to raising the level of truancy and absenteeism, special education, disciplinary problems, disengagement and dropout rates, teacher turnover, and property damage. Reflecting this, on the California School Staff Survey (Table A9.12), high school staff statewide are more likely to perceive alcohol and drug use as moderate to severe problems at their schools than all of seven violence-related indicators (49% for both alcohol and drugs in 2004-06), ranking them among the top 3 of 14 problem indicators.

Use at school is especially troubling (Tables A6.8-6.9). It reflects a level of drug involvement so pervasive that the potential repercussions for violation of school rules are disregarded by these youths. This is behavior that threatens not only the user's learning ability but also school efforts to educate all youth. An analysis of CHKS data found that that substance use and intoxication at school, being offered drugs at school, and lifetime intoxication, were significantly related to changes in California achievement test scores one year later. Schools with proportionately large numbers of students who reported these behaviors exhibited smaller gains in test scores than other schools[9] (CHKS Factsheet #3; see also School Climate What Works Brief #8).

Cigarette Smoking (Tables A7.1-7.4)

Current smokers are significantly more likely than nonsmokers to engage in alcohol and other drug use, be involved in violence and gang membership, and experience school-related problems and disengagement. To a lesser extent, current smokers are also more likely than nonsmokers to be victims of violence and harassment, feel unsafe at school, and experience incapacitating sadness and loneliness. These results suggest that efforts to reduce student smoking may be more successful if embedded in approaches that address a broad range of risk behaviors and problems (CHKS Factsheet #2 and #5).

Mental Health (Tables A8.4-8.5)

The CHKS Core provides two measures for assessing mental health among students: (1) whether they experience chronic, incapacitating sadness or hopelessness; and (2) whether they ever contemplated suicide. Students who experience chronic sadness, compared to their peers who do not, are at elevated risk of a wide range of educational, health, social, and emotional problems, including lower school attendance, performance, and connectedness. They also report lower levels of the developmental supports in their schools and communities that have been shown to mitigate these problems. Similar findings are found among youth who have contemplated suicide (CHKS Factsheets #11 and #12).
